Mount Rainier, MD – To reduce the risk of Coronavirus transmission to our residents and staff, measures have been taken to ensure that all City buildings have been thoroughly sanitized and disinfected. COVID-19 disinfectant services were donated by American Pest—a pest control and disinfectant service company serving residents and business owners throughout the District of Columbia, Maryland and Virginia—to clean City Hall, the Police Department, as well as the Public Works building.

The treatment provided by American Pest has been approved by the Environmental Protection Agency (EPA) as an effective treatment method to sanitize infected areas of Coronavirus (COVID-19) and bacterial infections. The disinfectant selected by American Pest is safe for all surfaces and naturally breaks down in every environment.

We would like to extend our gratitude to American Pest for the free services that will help keep our residents and staff safe, which is our top priority. Please visit the City’s website (www.mountrainiermd.org) and follow the City’s social media platforms (Facebook and Instagram) for the latest and most up-to-date City news and information.

For more information on the work of American Pest, please visit their website:
